### **Introducing the Vision LED Rechargeable Headlamp with Spot, Flood and Flash Modes**

HANOVER TOWNSHIP, PA- KOEHLER BRIGHTSTAR, LLC introduces the new intrinsically safe Vision LED Rechargeable headlamp. This compact USB rechargeable headlamp has attractive features such as a tilting head to angle the light at your feet or in a forward direction.

It sports 6 modes of operation. The Spot beam has a high, medium and low mode. The flood has a low and high mode. The sixth mode is flash for signaling the user's location to others. All light functions can be accessed by the large push button switch at the top of the headlamp.

On the Spot high mode, the Vision headlamp shines with 185 lumens, reaches a distance of 63 meters, and has a 6-hour run time. With the headlamp on the Spot low mode, it will run for just over 4 days before recharging. Use the flood modes for up-close work where you need a softer diffused light.

The Vision LED Rechargeable has a low-profile design that can fit under a shield or visor. The silicone lined headlamp band is comfortable to wear bareheaded and provides a solid grip on a cap or helmet. The IPx4 rated water-resistant design is suitable for outdoor use in wet environments. Available in Hi -Vis green color. Weight is 3.5 ounces.

**SAFETY: UL PROTECTION METHODS, UL 913 CSA C22.2  
INTRINSICALLY SAFE, CLASS I, II, III, DIV. 2 GROUPS A-G T4**

Model # 200521, MSRP \$49.95

#### **About Koehler Bright Star, LLC**

Koehler Bright Star manufactures tough lights that help professionals who work in dark places stay safe and get the job done. Our flashlights, lanterns and headlamps serve the mining, marine, industrial, fire, and manufacturing industries. We develop and ship our products from Hanover Township, Pennsylvania; and they're used in some of the darkest, most challenging environments all over the world.
